

# Weekly Report - Week 12

**Name:** Steven Crosby

**W-number:** W0218814

**Date:** March 28th, 2024

## Project

**Project Name:** WPF Music Store application

**Project Description:** This week's efforts were focused on researching how to implement a store interface for the WPF application. After thorough investigation, it was determined that integrating the store directly within the database might not be feasible. Various alternative solutions and architectures were explored, including the possibility of using separate services to manage store transactions and interactions, ensuring scalability and maintainability of the application.

## Project Tasks

Project Tasks	Estimate Hours	% Comp	Actual Hours	Assigned to	Task Description
Research on Store Interface Implementation	16	100%	10	Steven Crosby	Conducted extensive research on implementing a store interface for the WPF music store application. Evaluated the feasibility of direct database integration and explored alternative approaches.

## Report Issues

Date	Issue	Resolution
28/03/2024	Integrating store interface directly into the database deemed not feasible.	Exploring alternative solutions and architectures to ensure scalability and maintainability without direct database integration.
